LONDON HOUSE

FOR

RIDGWAY & CO.'S SANITARY VESSELS,

INCLUDING

FOUNTAIN BASINS, CLOSETS, SINKS, &c.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this combination is to facilitate the introduction of sanitary improvements under the demolition of the working drains, by the adoption of such an arrangement of strong soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse by preventing the enormous waste of water in places of this description, to which under compulsion now so strongly and so properly object. By the use of the service-box an ample supply of water is obtained, without the possibility of the flushing valve being propped open, replacing the ordinary cistern. It is so constructed that, owing to the large water reservoir which, a further supply cannot enter the apparatus from the main. Drawings and descriptions may be obtained from STOCK and SON, Manufacturers of Plumbers' Brass-work, Baths, Closets, Rotary Screw-down Taps, Flow Plugs, Gas Fittings, and Church Furniture in iron and brass, Temple-street, Birmingham.

ESTABLISHED 1838.

N.B. The exclusive supply of Asphalte from the Mines of Pyrimont Seyssel being contended to this Company, the Directors particularly recommend Architects, Builders, and others (for the purpose of ensuring the use of the genuine article) to insert in their specifications "BITUMEN, ASPHALTE, CLARIDGE'S PATENT," and not merely "Asphalte," or "Bitumen," as in many cases where these terms have been used, poor, tar, and other worthless and offensive compositions have been introduced.

SUPERIOR GLAZED STONEWARE DRAIN PIPES,

formed and manufactured by

WILLIAM NORTHER, UNION POTTERY, No. 34, VAUXHALL-WALK, LAMBETH.

W. NORTHER begs to inform surveyors, contractors, builders, water companies, &c. that he has completed "Norther's" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON-TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it ensures perfect uniformity in bore and size, both of pipes and sockets, the consequence of a different and better construction than any others now in use; and the pipes and sockets being made by this process are secure from separation.

W. N. invites particular attention to the superior quality of the glaze used in his manufactory, which is equal to glass, and rendering stoppage in the drains impossible. CLOSET PANS, with improved Syphon Trap formed inside without joints.—W. NORTHER'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:
